

Message from Converus President and CEO

If Your Organization Needs to Quickly Find the Truth, Then Read This...

Hi,

Many of you work in organizations where accurately finding the truth is paramount. *Has a job applicant been truthful about past activities? Is an employee engaged in harmful or inappropriate activities? Did a suspect commit a serious crime?*

Credibility assessment tools help organizations accurately expose the truth. By doing so, you can hire well, reduce risk, save time *and* spend less.

We've recently made some revisions to converus.com. Now you can quickly find how others within your industry or profession are benefiting from EyeDetect by clicking on 1 of 9 buttons on the home page. For a quick preview, find which one is applicable to you below:

Over 100 public safety agencies worldwide use EyeDetect to quickly weed out "bad apples" and identify the best candidates. You can also use it to conduct fast, efficient investigations. For a free, no-obligation test drive, [click here](#).

Employees, parolees, and patients will do just about anything to avoid trouble. When the truth is known, better decisions can be made. Identify which guards are providing contraband or using excessive force. Verify if parolees have reoffended or broken the terms of their release.

Quickly identify insider and external threats. Military, police and intelligence agencies worldwide use EyeDetect to find the truth. Remember: If someone lies to get a security clearance, they'll probably lie to keep it.

Reliable information helps with decisions. Investigators, attorneys and police use EyeDetect for client control, unbiased testing, and in cases lacking physical evidence. One police detective said: "If I could only use one credibility assessment tool in investigations, it would be EyeDetect."

The goal of credibility assessment is to accurately find the truth. Polygraph has been the standard for a century. Now EyeDetect offers examiners new benefits — while allowing them to preserve the art of the interview. [Click](#) to see "10 Reasons Polygraph Examiners Use EyeDetect."

Security forces are tasked with keeping people, places, and information safe. A bad employee threatens a company's reputation, a customer's assets, and public safety. With EyeDetect, companies effectively manage risk by hiring honest people and conducting investigations.

Avoiding bad hires and bad transactions are important tasks of financial institutions. With EyeDetect, you can carefully vet employees in positions of trust, reducing fraud and theft. Reduce risk and bad transactions by assessing the honesty of potential clients.

A bad hire of a person in a position of trust threatens any organization's information, assets and security. With EyeDetect, manage employee risk by hiring honest people, monitoring employee compliance, and conducting investigations quickly and objectively.

Knowing if a driver has previously committed illegal acts helps safeguard your company's assets and customers. Avoid hiring drivers who use their position to steal from you. Avoid hiring drivers who can threaten an organization's reputation by putting public safety at risk.

I hope you'll take a moment now to visit [our revised website](#) and learn more about how EyeDetect can meet your specific needs for verifying truth.

New Service Partners

About Converus

Converus provides scientifically validated credibility assessment technologies. EyeDetect®, which detects deception by measuring involuntary eye behavior, is a fast, accurate, affordable, noncontact, scalable, and fully automated option to polygraph. EyeDetect+ is the world's first automated polygraph, making the testing process impartial, accurate, and less intrusive (than a traditional polygraph). It assesses credibility by monitoring and recording ocular activity plus physiological activity similar to a traditional polygraph. Customers worldwide use the EyeDetect product line for screening and investigations to help protect countries, corporations and communities from corruption, crime and threats. Converus is headquartered in Lehi, Utah, USA. Visit: converus.com
